DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chui (US Patent No. 6,657,702) in view of Fabozzi, II. (US Patent No. 6,085,251).

Regarding claims 1, 21 and 41, Chui discloses a method of copying computer files to a destination location, comprising: receiving a copy instruction, the copy instruction identifying a

Art Unit: 2173

plurality of computer files to be copied and the destination location (see col. 3, lines 1-61); and displaying attributes of the plurality of computer files simultaneously, in an order in which the plurality of computer files are to be copied (see col. 11, lines 38-67); however, Chui fails to explicitly teach copying the plurality of computer files to the destination location in the order in which the plurality of computer files are to be copied.

Fabozzi, II teaches and copying the plurality of computer files to the destination location in the order in which the plurality of computer files are to be copied (see col. 5, lines 8-63). It would have been obvious to one of an ordinary skill in the art the time the invention was made to provide and copying the plurality of computer files to the destination location in the order in which the plurality of computer files are to be copied as taught by Fabozzi, II to the facilitating photographic print with identifier identifying a recipient of Chui in order to enhance a user friendly while copy/delete file interactively and visually on screen.

Regarding claim 2, Fabozzi II, discloses wherein the plurality of computer files includes a currently copying computer file, the currently copying computer file being a computer file that is being copied at the same time the attributes of the plurality of computer files are displayed (see abstract and figures 1-2).

Regarding claims 3 and 4, Chui discloses further comprising displaying a progress indicator indicating an amount of the currently copying computer file that has been copied to the

Art Unit: 2173

destination location; and further comprising displaying an estimated time of completion of copying the currently copying computer file (see col. 22, lines 1-57).

Regarding claim 5, Fabozzi, II discloses wherein displaying the progress indicator includes: identifying a data size of the currently copying computer file; identifying an amount of data, corresponding to the currently copying computer file, that has already been copied to the destination location; and displaying the progress indicator based on the data size of the currently copying computer file and the amount of data that has already been copied (see col. 4, lines 8-67).

Regarding claim 6, Fabozzi, II discloses wherein displaying the estimated time of completion includes identifying a copy rate; identifying a data size of the currently copying computer file; identifying an amount of data, corresponding to the currently copying computer file, that has already been copied to the destination location; and displaying the estimated time of completion based on the copy rate, the data size of the currently copying computer file and the amount of data that has already been copied to the destination location (see col. 6, lines 1-67).

As claims 7-14 are analyzed as previously as discussed with respected to claims 1-6 above.

Regarding claim 15, Fabozzi, II discloses wherein the reorder criteria includes at least one of alphabetical order, reverse alphabetical order, smallest to largest file data size, largest to smallest file data size, oldest to most recent file creation date, and most recent to oldest file creation date (see col. 6, lines 5-15).

Art Unit: 2173

Regarding claim 16, Chui discloses wherein displaying the attributes of the plurality of computer files includes displaying the attributes of the plurality of computer files in a graphical user interface (see col. 15, lines 31-67).

Regarding claim 17, Chui discloses receiving a skip command; and changing a display of an attribute of a computer file from the plurality of computer files to indicate that the computer file is to be skipped during copying of the plurality of computer files (see col. 16, lines 9-62).

Regarding claim 18, Chui discloses receiving a delete command; and changing a display of an attribute of a computer file from the plurality of computer files to indicate that the computer file is to be deleted after copying of the plurality of computer files (see col. 21-22, lines 1-67).

Regarding claim 19, Chui discloses further comprising not copying computer files that have been indicated as being computer files that are to be skipped during copying of the plurality of computer files (see figures 2F-3B).

Regarding claim 20, Chui discloses further comprising not copying computer files that have been indicated as being computer files that are to be skipped during copying of the plurality of computer files (see figures 5-9).

As claims 22-63 are analyzed as previously as discussed with respected to claims 1-6 and 15-20 above.
